

## COVID-19: Five key goals in managing an obstetric emergency

### 1. Teamwork:

Assign team roles and help each other to get ready.

### 2. Transitions:

Be aware of the transitions of staff and equipment between 'dirty' and 'clean' zones.

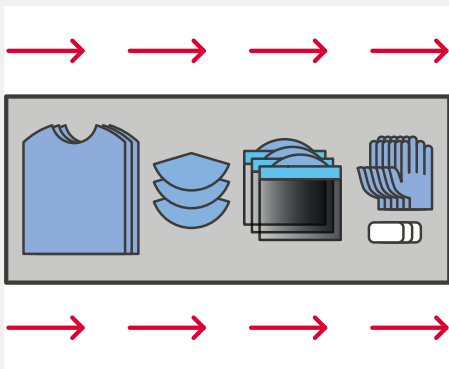

### 3. Communication:

Recognise and manage communication challenges caused by wearing PPE.

### 4. Design and layout:

Organise work flows and equipment to make the right way the easy way.

### 5. Evaluate:

Take the opportunity to debrief as a team.

This project is supported by the PROMPT Maternity Foundation, the Royal College of Obstetricians and Gynaecologists, the Royal College of Midwives, the Obstetric Anaesthetists' Association, Each Baby Counts, and the Infection Prevention Society.
